

Text Book of**Pediatric Gastroenterology Hepatology and Nutrition**

The Textbook on Pediatric Gastroenterology, Hepatology and Nutrition is a very comprehensive and up-to-date text book organized in three sections and 37 chapters and has to its credit many international and Indian authors who are authorities in their respective fields. The book has been written keeping in mind the latest developments in the field.

The special features of this book are that it is simple, lucid and easy to understand language. The text is interspaced with suitable tables, flow charts, diagrams, X rays and photographs which along with exhaustive bibliography are proof of the tremendous effort that has been put in while writing this textbook. The book is printed on a good quality paper using a large font which has enhanced its visual appeal and made reading an enjoyable experience.

The textbook provides extensive insight of each topic with a focus on basic concepts. Few chapters like food allergy and metabolic disorders in older child are supplemented with the clinical scenarios that provide the reader with clear take home messages.

We recommend this book as a must buy to all the post graduate students, faculties, paediatric gastroenterologist as well as general pediatricians with an interest in gastroenterology to supplement their knowledge and get more clarity on this subject.
