

## EDITORIAL

We are delighted to welcome you to Special Issue: ICFP 2022 of the Journal of Nepal Physical Society (JNPS), Volume 8, Issue 1 (2022). At first, it gives us great pleasure to be grateful to all the authors who have chosen to submit their work to JNPS for publication. Now, the journal has given preference to physics oriented studies over experiment and theory. In spanning of time along with the enhancement of NPS journal, we received help from many more reviewers in 2020 - 2022 for the rigorous evaluation process and as a result, we were able to process articles more quickly and add more articles per year.

Over the past two years, we have done a fantastic job, shaping the journal to ensure it has maintained its place as the leading physics publication in Nepal. The Journal's sustained success is a result of the hard work of our forerunners as well as the team of editors, contributors, readers, and support personnel. We, the editorial board, and you, the JNPS

readers, have seen a lot of changes in the journal during the past year. So, the journal influences in lockstep with its recognition among the world's scientific community.

There are 13 peer-reviewed original research papers in this special issue. The manuscripts span a wide range of topics including but not limited to high-energy physics, space and atmospheric physics, plasma, material science, and condensed matter physics. The manuscripts that were published underwent a rigorous peer-review process.

On behalf of JNPS, we would like to express our gratitude to the members of our editorial board and reviewers. Special thanks are to the contributors for providing their innovative research works to the readers via this special issue of JNPS. The JNPS Editorial Team appreciates constructive feedback to improve the publication's upcoming issues. Finally, thank you so much for your questions, suggestions, and correspondence.
